

CSCI 127: Joy and Beauty of Data

Conclusion and Goodbye

Reese Pearsall
Summer 2021

<https://reese.github.io/classes/summer2021/127/main.html>

Congratulations!

Congratulations!

You made it through CSCI 127: Summer 2021!

Congratulations!

You made it through CSCI 127: Summer 2021!

- or maybe you still need to submit the final
- or maybe you still need to submit Program 5
- ... or you might be very pissed at me
after giving you that final exam

Course Evaluations:

Thank you for taking time to fill out the evaluation. I am really looking forward to seeing your feedback!

Percentage of students that submitted an evaluation:

Course Evaluations:

Thank you for taking time to fill out the evaluation. I am really looking forward to seeing your feedback!

Percentage of students that submitted an evaluation: **77%**

You should know your final grade in this class by next week 😊

Overview of our CSCI 127 Course

Weeks 1, 2, and 3

Basic of Python

Data Types
User Input
Functions
If Statements
Loops
Lists
Strings
Modules
Recursion
Variable Scope

Weeks 4 and 5

Advanced Python

Files
Dictionaries
OOP

Weeks 5 and 6

Data Science in Python

Numpy
Matplotlib
Pandas

The Future....

I am happy to be of service to you in the future:

- Computer Science Advice and Help
- Reference/Recommendation Letter

You can also contact me through Discord
I am very active on there 😊

CS Student Success Center

I spend quite a bit of time in Barnard and Norm

Student Success Center - Spring 2021

The tutors in our Student Success Center, Barnard Hall 259, are generally available to assist students in lower division computer science courses.

Important Change

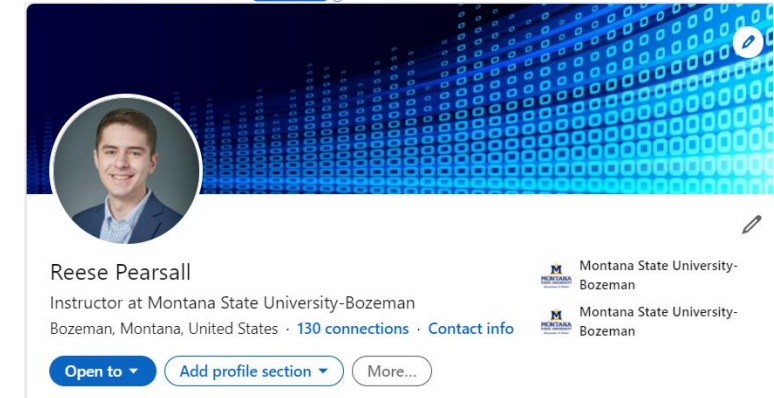

- Due to COVID-19, in-person tutoring might or might not be available during Spring 2021.
- If in-person tutoring is not possible, tutors will be available remotely. In this case, the two of you can arrange how best to proceed (e.g. e-mail, text, phone, WebEx, Skype).
- This page will be updated after Spring Semester begins.
- [Click Here for Microsoft Teams Access!](#)
- [Follow these instructions to get signed up for Microsoft Teams.](#)

Tutoring Schedule

Schedule	Monday	Tuesday	Wednesday	Thursday	Friday
8:00 a.m.					
9:00 a.m.		Joshua Anderson (IP)			
10:00 a.m.		Joshua Anderson (IP) Anthony Nardello (IP)	Karishma Rahman (V)		
11:00 a.m.		Anthony Nardello (IP) Nic Dzomba (IP)	Karishma Rahman (V)		
Noon		Nic Dzomba (IP)		Nic Dzomba (IP)	
1:10 p.m.			Arnold Smithson (IP-V)		
2:10 p.m.	David Hamlin (IP) Faqeer ur Rehman (V, IP)		Arnold Smithson (IP-V) Seraj Mostafa (V)		
3:10 p.m.	David Hamlin (IP)		Seraj Mostafa (V)	Nate Lane (V)	
4:10 p.m.			Matthew Wintersteen (IP-V)	Nate Lane (V)	
5:10 p.m.					
6:00 p.m.					
7:00 p.m.					
8:00 p.m.					
9:00 p.m.					

Personal Email:
reesepearsallcs@gmail.com

LinkedIn Connect with me on LinkedIn!

I will be around for another few years. If you see me around, say hello!

If you are a CS major, there is a very good chance our paths will cross again

... You might have me as an instructor again

My hopes for you...

I hope that you can take away skills that will be helpful for you in your future

I hope you at least had some fun and found this content to be *interesting*

I hope that I gave you the tools and skills you need to **solve problems** using Python

(Remember, the best way to get better at programming is to program more!)

I hope you have a different perspective of programming, computers, and technology

If you are a CS major, I hope that I gave you the foundation you need to succeed in future CS class

If you are not a CS major, I hope that you can find uses for Python and programming in your discipline/area of work

You can include
Python on your
resume now!

Normal showers:

```
float temperature;
```

My shower:

```
boolean temperature;
```

Some takeaways...

- Programming can be challenging, but not impossible. It takes time and effort to become better
- Computers seem smart and are able to do things very quick, but they lack imagination– that's where we come in!
- I hope that you don't let one programming assignment, exam, or class totally dictate your perspective of whether you belong or not

My Thoughts:

- This class was an absolute blast for me to teach. **Thank you** for making this a great experience for me
- I am very please with how the class turned out how well you all did.
- I've enjoyed meeting with you all and talking with you during office hours, 1 on 1 meetings, Discord, and through Email!
- Because you are one of my first classes of many to come, you all will always have a special place in my heart 😊

Doctors: Googling stuff online does not
make you a doctor.

Programmers:

Some closing thoughts....

Some closing thoughts....

“Not everyone can become a great artist, but a great artist can come from anywhere”

-Anton Ego, *Ratatouille*

Some closing thoughts....

THE END

**Congratulations on making it through 127 !
Good luck in future classes/careers !
Stay in touch !**

**I hope this class was as good of an experience
for you as it was for me— Thank you**
